1.INTRODUCTION

1.1 OVERVIEW:

Starting a new company can be an exciting and rewarding experience, but it also requires careful

planning and analysis to ensure that the business is viable and successful. There are several key

areas that you should focus on when conducting a startup company analysis. Conducting a

through analysis of these areas can help you identify potential challenges and opportunities, and

develop strategies to address them. It is also important to regularly review and update your

analysis as the business progresses, in order to adapt to changing market conditions.

1.2 PURPOSE OF THIS PROJECT

This project used for “STARTUP ANALYSIS” in problem defining.

Understanding the problem, specify the business problem, requirements of business, literature survey and business impact. Through this project we learned how to do data preparation and how to visualize data produced. In this project helps for creating the dashboard and the story using the visualization. We learned how to upload the prepared dashboard and story to the web. Through this project have learned the charge and range analysis for electric vehicles. This project helps for how to handle many software. Also, this project contains many uses full details.

2. PROBLEM DEFINITION & DESIGN THINKING

2.1 EMPATHY MAP

Empathy map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

Build empathy
The information you add here should be representative of the observations and research you've done about your users.

STARTUP ANALYSING

Seen
What have you seen through their eyes?
What have they seen through yours?

Thoughts
What are their beliefs, needs, wants, and desires? What else do you think they believe or desire?

Feelings
What do you think they are feeling?
What do you think they are thinking?

Do
What do you think they are doing?
What do you think they are thinking?

Says
What do you think they are saying?
What do you think they are thinking?

Needs
What do you think they need?
What do you think they are thinking?

Pain Points
What do you think they are experiencing?
What do you think they are thinking?

Goals
What do you think they are trying to achieve?
What do you think they are thinking?

Values
What do you think they value?
What do you think they are thinking?

Attitudes
What do you think they are feeling?
What do you think they are thinking?

Behaviors
What do you think they are doing?
What do you think they are thinking?

Interests
What do you think they are interested in?
What do you think they are thinking?

Skills
What do you think they are capable of?
What do you think they are thinking?

Resources
What do you think they have access to?
What do you think they are thinking?

Support
What do you think they are getting help from?
What do you think they are thinking?

Environment
What do you think they are in?
What do you think they are thinking?

Context
What do you think they are doing?
What do you think they are thinking?

Background
What do you think they are from?
What do you think they are thinking?

History
What do you think they have been through?
What do you think they are thinking?

Future
What do you think they are looking forward to?
What do you think they are thinking?

Present
What do you think they are experiencing now?
What do you think they are thinking?

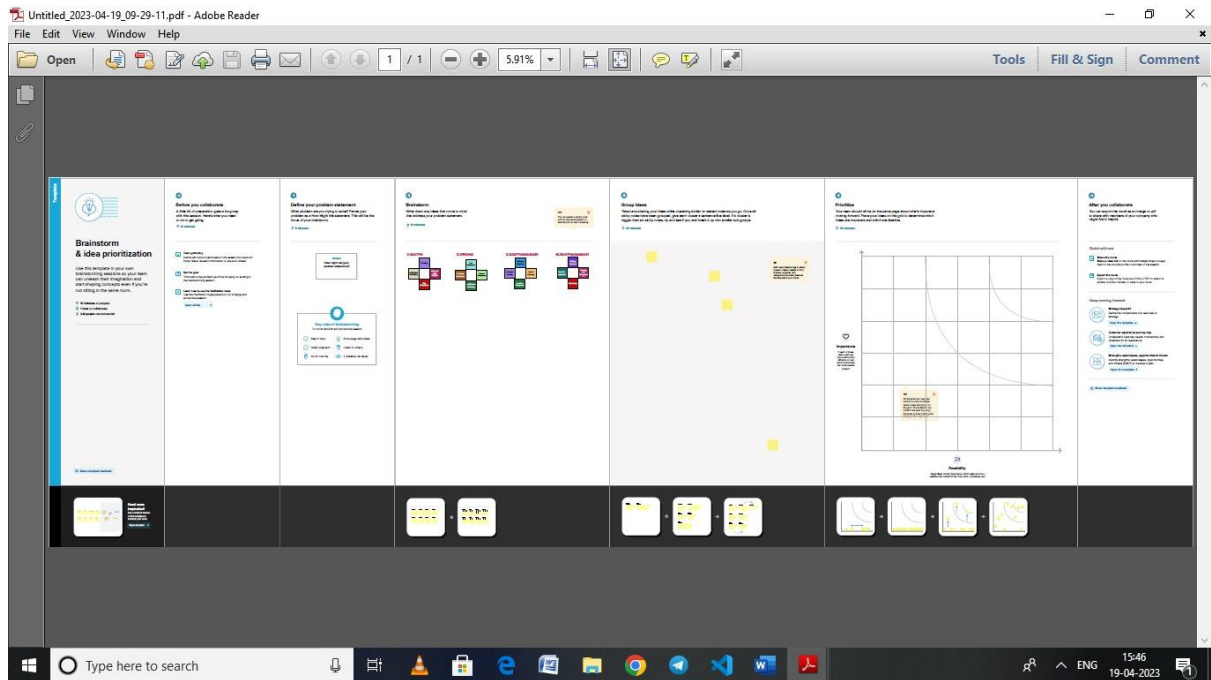

Past
What do you think they have been through?
What do you think they are thinking?

Future
What do you think they are looking forward to?
What do you think they are thinking?

Present
What do you think they are experiencing now?
What do you think they are thinking?

Past
What do you think they have been through?
What do you think they are thinking?

3. RESULTS

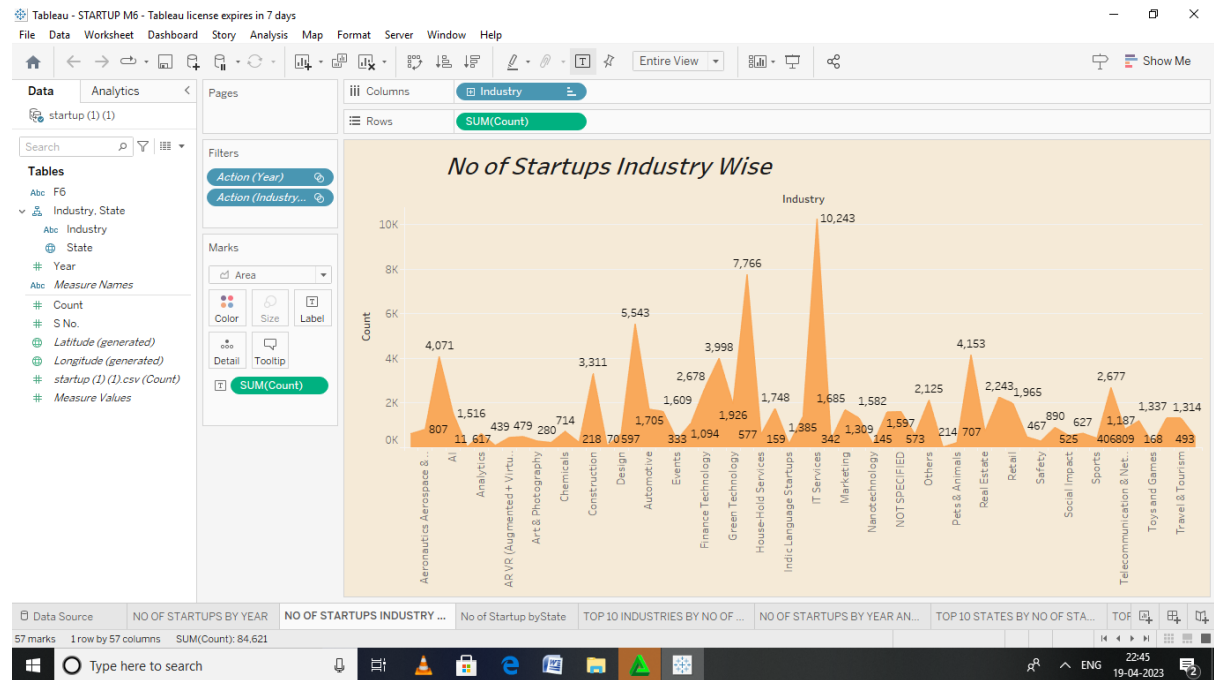

MILESTONE 4: DATA VISUALIZATION

ACTIVITY 1: NO OF UNIQUE VISUALIZATION

Activity 1.1: Number of Startups by Year

ACTIVITY 1.2: NUMBER OF STARTUPS INDUSTRY WISE

ACTIVITY 1.3: NUMBER OF STARUPS BY STATE

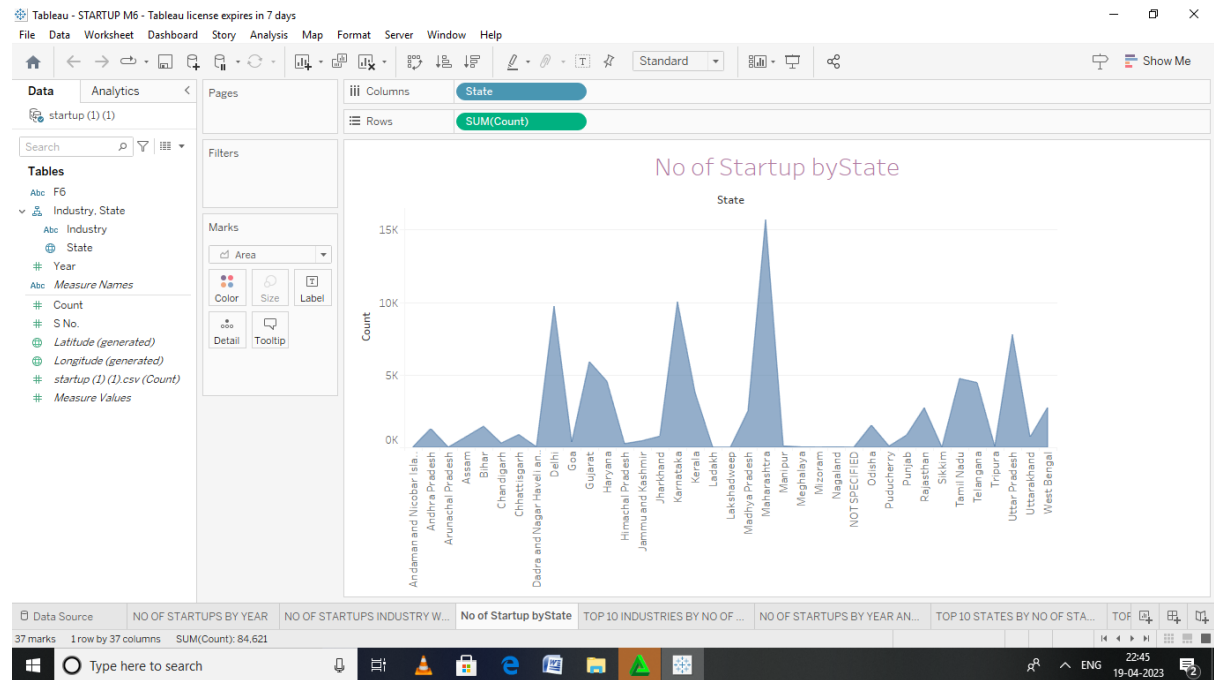

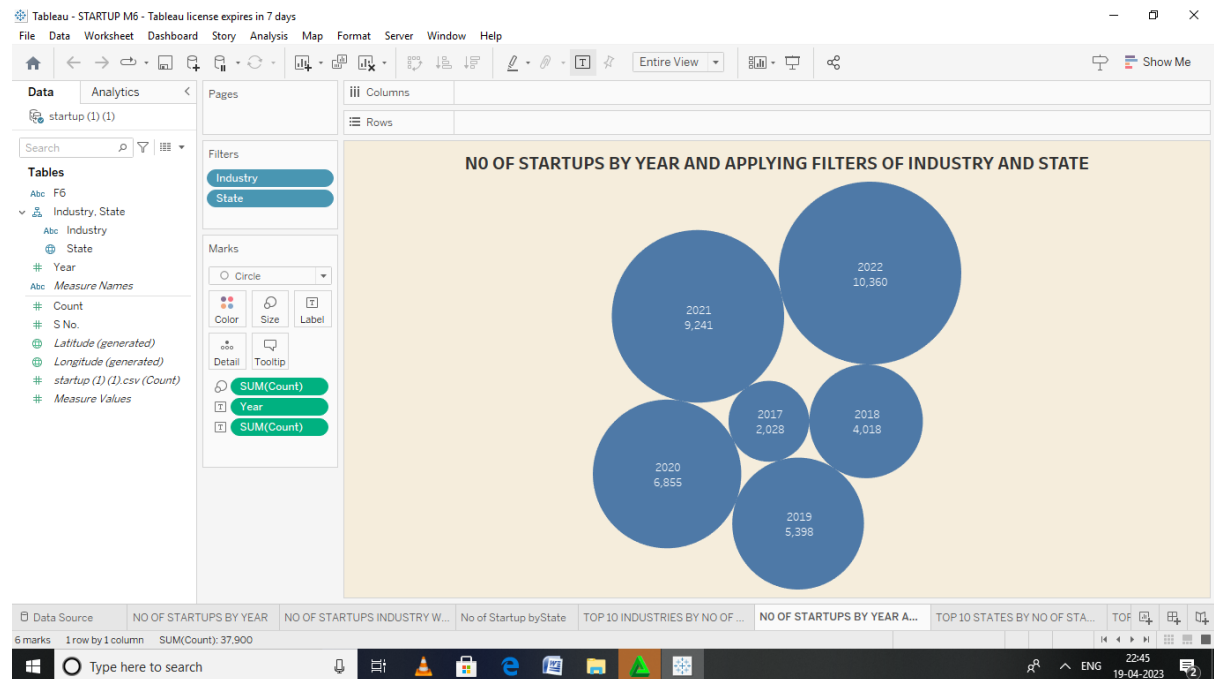

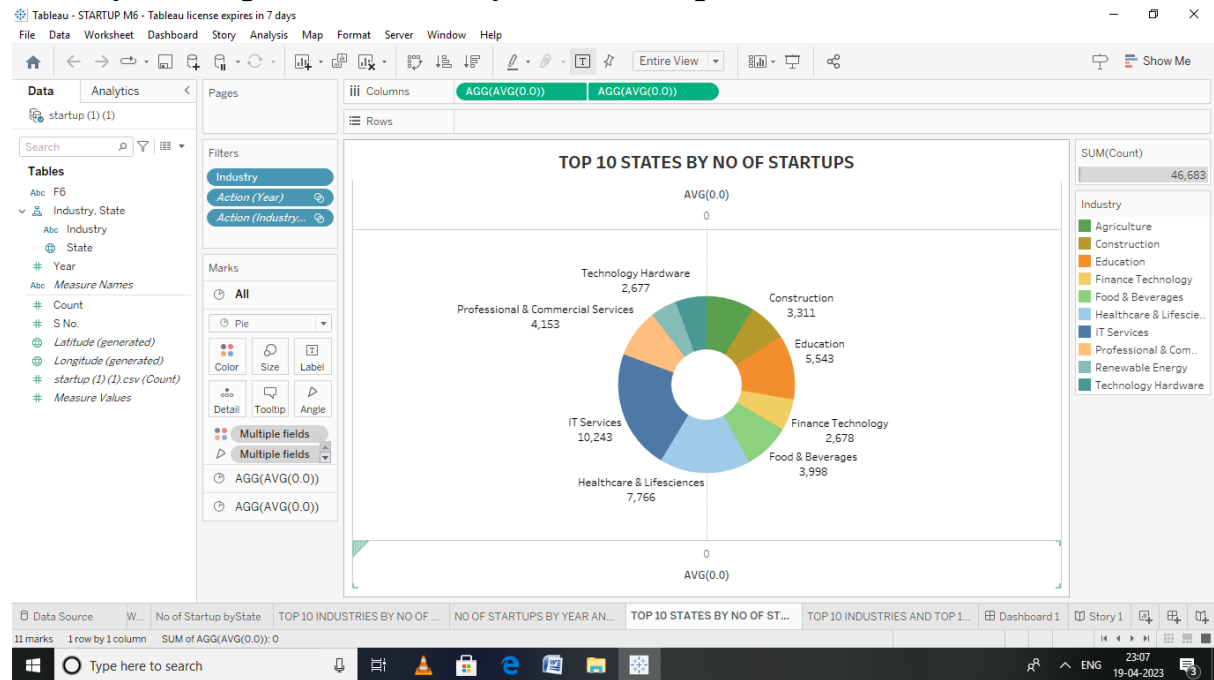

Tableau - STARTUP M6 - Tableau license expires in 7 days

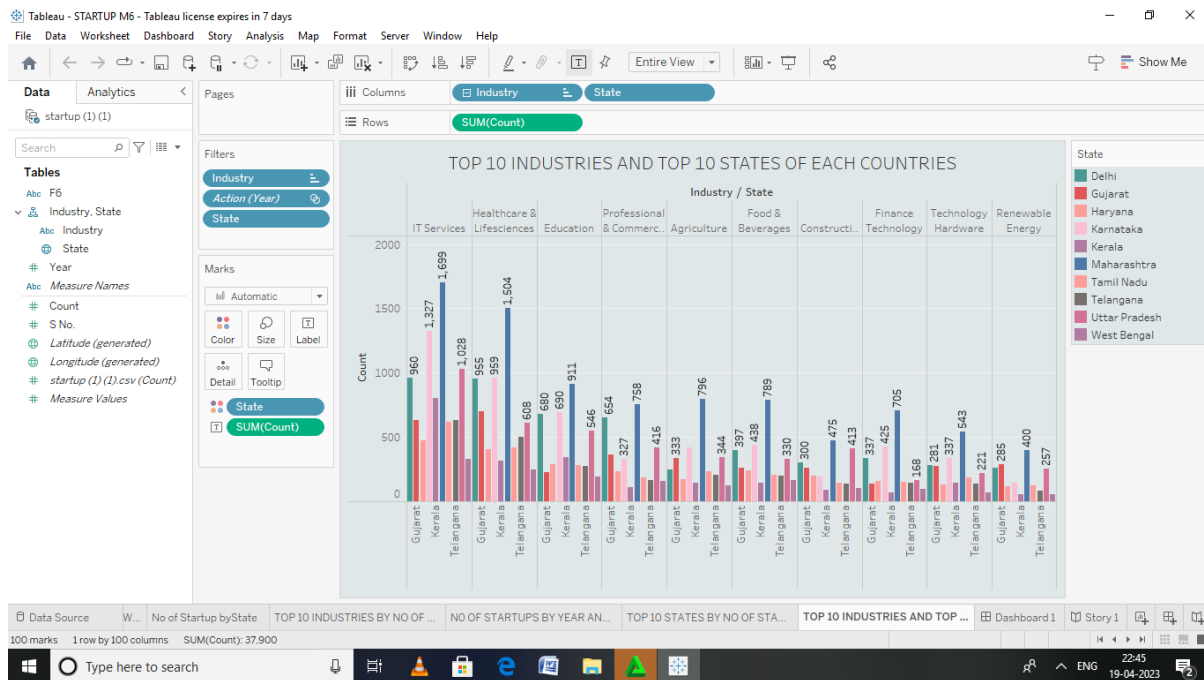

Activity 1.5: Number of Startups by year and applying filters of Industry and State

Activity 1.6: Top 10 Industries by no of Startups

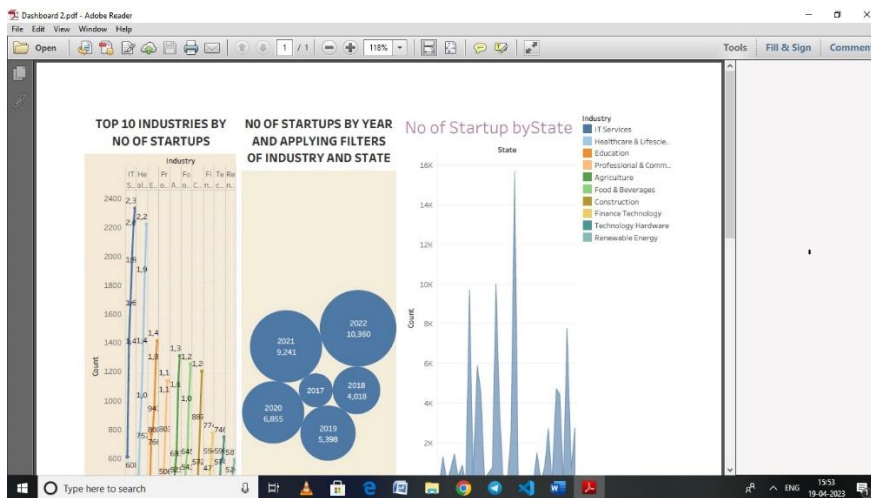

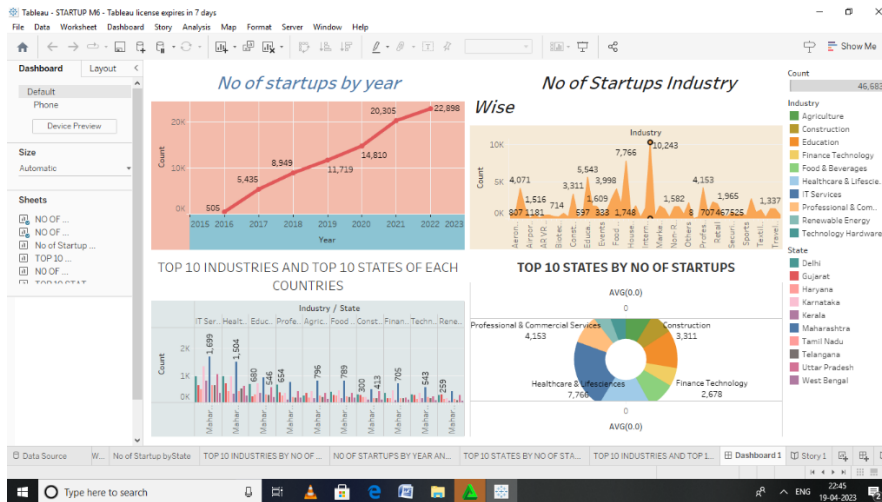

Activity 1.7: Top 10 Industries and Top 10 States of each industry

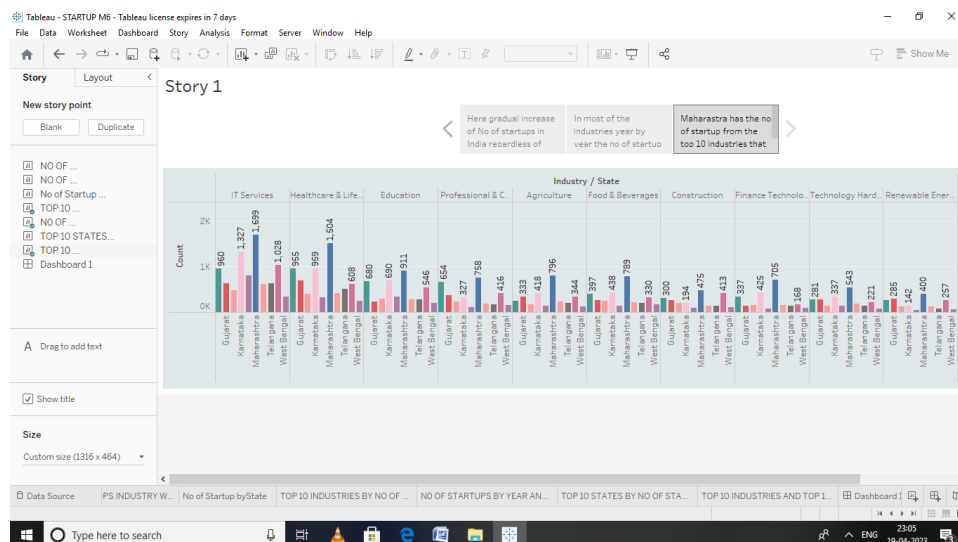

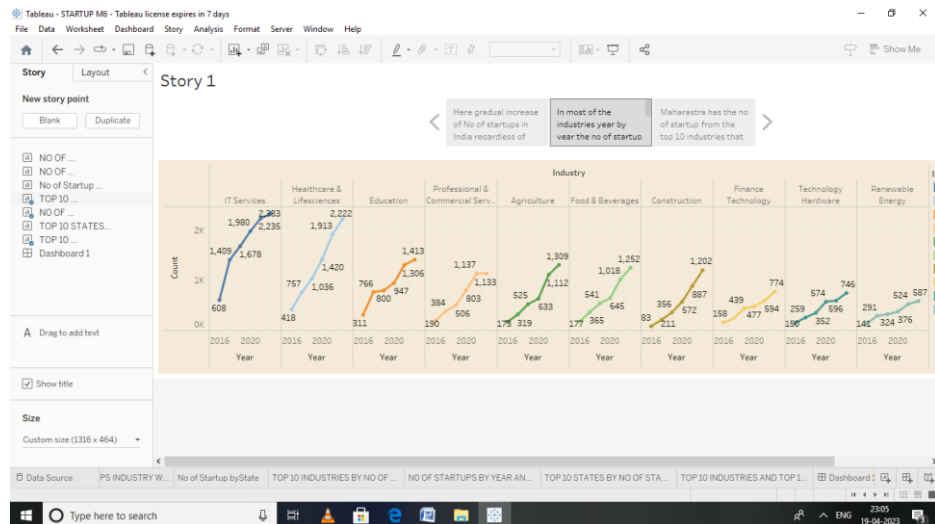

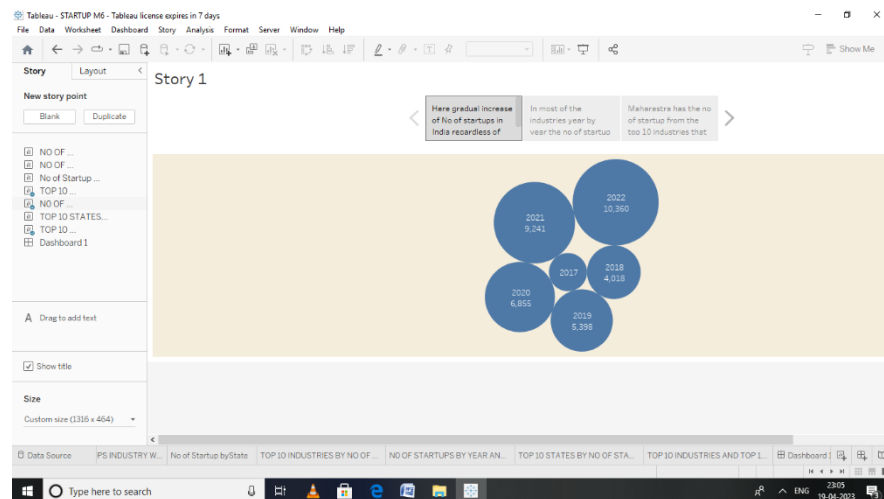

Milestone 5: Dashboard

Responsive and Design of Dashboard

Milestone 6: Story No of Scenes of Story

4. ADVANTAGES & DISADVANTAGES

4.1 ADVAVANTAGES

Innovation: Startups focus on creating innovative disruptive solutions to problems or unmet needs in the market. They often use emerging technologies and business models to offer new products or services that are more efficient, cost effective or user friendly than existing ones.

Creativity: Startups foster a culture of creativity and open mindedness, which enables them to think outside the box and come up with new and innovative ideas. They encourage employees to be proactive, entrepreneurial, and collaborative, which is a dynamic and innovative work environment.

Job creation: Startups are significant drivers of job creation, particularly for young people and those with high level skills. They often create new employment opportunities in emerging growing, which contributes to economic growth and development.

4.2 DISADVANTAGES:

High risk: Startups are often associated with high risk, as they operate in an uncertain and dynamic environment. They can face several risks, such as competition, regulation, market fluctuations, and technological disruption, which can lead to failure or bankruptcy.

Limited resources: Startups have limited financial, human, and physical resources, which can hinder their ability to develop and scale their business. They often rely on

external funding, such as venture capital or angel investment, which can be difficult to secure, and may require giving up a significant stake in the company.

Limited resources: Startups have limited financial, human, and physical resources, which can hinder their ability to develop and scale their business. They often rely on external funding, such as venture capital or angel investment, which can be difficult to secure, and may require giving up a significant stake in the company.

Uncertain revenue: Startups often have uncertain revenue streams in the early stages of development, and may struggle to generate consistent income or profitability. This can make it difficult to attract investment or sustain the business over the long term.

5. APPLICATIONS

Healthcare: Startups are developing innovative solutions to improve healthcare delivery and patient outcomes.

Finance: Startups are disrupting traditional financial services by offering more accessible, efficient, and affordable alternatives.

Education: Startups are transforming education by leveraging technology to make learning more engaging, personalized, and accessible.

Energy: Startups are developing new technologies and business models to improve the sustainability and efficiency of energy production, distribution, and consumption.

Transportation: Startups are developing innovative solutions to improve the efficiency, safety, and sustainability of transportation.

Retail: Startups are transforming the retail industry by leveraging the power of e-commerce, social media, and data analytics.

Food and Agriculture: Startups are revolutionizing the food and agriculture industries by offering sustainable, efficient, and organic farming practices and food delivery services.

Social Media and Communication: Startups are leveraging new communication technologies to offer alternative social media platforms, messaging tools, and virtual meeting solutions.

Real Estate: Startups are disrupting the traditional real estate industry by offering alternative models such as co-living, home-sharing, and affordable housing solutions.

Environmental and Sustainability: Startups are creating innovative solutions to combat climate change and improve sustainability measures across various industries, such as recycling and green energy.

6.CONCLUSIONS

A data analysis project is a complex undertaking that requires the collection, processing, and interpretation of data to extract insights that will drive business decisions. The conclusion of this project is a critical aspect as it offers a comprehensive summary of the findings obtained from the data analysis in industries. By this we can represent the graphical presentation for top 10 startup industries various states. Overall, a well-concluded data analysis project will provide significant value to the business, help in making data-driven decisions and drive growth and development.

7.FUTURE SCOPE

Emerging Technologies: Startups are at the forefront of emerging technologies such as artificial intelligence, blockchain, quantum computing, and the internet of things. The future scope for startups in these areas is vast, with applications across various industries, such as healthcare, finance, and transportation.

Sustainability and Environmental Protection: The world is facing major environmental challenges such as climate change, deforestation, pollution, and loss of biodiversity. Startups have the potential to offer sustainable and innovative solutions to these challenges, such as renewable energy, waste reduction, and circular economy models.

Healthcare: The healthcare industry is rapidly advancing, with new technologies and breakthroughs in fields such as genomics, immunotherapy, and digital health. Startups have the potential to offer disruptive and personalized healthcare solutions that improve patient outcomes, reduce costs, and increase access to care.

Social Impact: Startups are also focusing on creating social impact and addressing some of the world's most pressing problems, such as poverty, inequality, and discrimination. Future scope for startups in this area includes alternative models of education, affordable housing solutions, and social entrepreneurship.

Space Exploration: Space exploration is another area with significant future scope for startups, as private companies increasingly lead the way in space travel, satellite technology, and even colonizing other planets.

Overall, startups are well-positioned for future growth and success, as they continue to offer innovative and disruptive solutions to complex problems, leverage emerging technologies, and create positive social and environmental impact.
